Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-7 and 19-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 4 and 19, the phrase “an engineered point of weakness” is vague and indefinite because it has no clear meaning.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 4-8, 10-17, 19-23 and 25-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Wood (5,927,549). To the extent that the Examiner can determine the scope of the claims, Wood discloses a portion dispensing container assembly comprising a container (12) having an externally threaded finish portion (32), a closure main body (10, 28, 36) mounted to finish portion and having a storage space for holding additive material (100), a plunger member (90) mounted for linear movement with respect to the closure main body between a first, upper position and a second, lower portion wherein said storage space is caused to open into communication with the container (Figures 6 and 7) and tamper evident interlock means (26, 50)

Art Unit: 3728

for preventing movement of the plunger member to the second, lower position until the tamper evident interlock means is defeated by a consumer (Figures 1-7).

As to claim 4, Wood discloses the closure main body comprises a point of weakness (42) in the structure defining the storage space. As to claim 5, the structure comprises a flexible sealing member (40). As to claim 8, the plunger member comprises a blunt upper surface (84, column 6, lines 48-50) adapted to be depressed by a consumer. As to claim 10, Wood discloses the plunger member comprises a lower body portion (94, 96) and an upper head portion (62) that is wider in longitudinal cross section than the lower body portion. As to claims 11-15, the tamper evident interlock means comprises a circumferentially extending tamper evident strip (26, Figure 5) positioned between the upper head portion of the plunger member and the closure main body.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wood (5,927,549) in view of Elliott (6,003,728). Wood discloses the portion dispensing container assembly as above having all the limitations of the claims except for the blunt upper surface being convex. Elliott teaches a blunt upper surface is convex (96, 98, 102). It would have been obvious to one having ordinary skill in the art at the time the invention was made in view of

Art Unit: 3728

Elliott to modify the blunt upper surface of Wood so it comprises a convex to facilitate depressing the plunger member.

Allowable Subject Matter

7. Claims 3 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
